## FrostEn

### Il tubo di rame per condizionamento e refrigerazione Cu-DHP 99,90 min. secondo le norme EN 12735-1 e 2

Il tubo di rame FrostEn è frutto di nuove tecnologie ed è la risposta più moderna alle sempre più crescenti esigenze tecnologiche. Lo speciale trattamento di pulizia permette di ottenere una superficie interna perfettamente liscia, lucida e speculare ed un residuo totale inferiore a 38 mg/mq, così come previsto dalle norme EN 12735-1 e 2. Il tubo di rame FrostEn viene fornito in rotoli, verghe e bobine IXWC, tappati alle estremità. Il tubo di rame FrostEn può essere utilizzato per impianti di condizionamento e refrigerazione ed è adatto al passaggio di tutti i gas refrigeranti compatibili con il rame inclusi i nuovi gas R 407 C e R 410 A. Il controllo in linea di lavorazione a mezzo defectomat ed il controllo costante del diametro esterno e dello spessore garantiscono la massima sicurezza al tubo FrostEn. Le caratteristiche distintive del tubo di rame FrostEn sono:

- pulizia interna particolarmente accurata;
- malleabilità e facilità di posa in opera;
- diametro e spessore perfettamente calibrati e costanti;
- resistenza meccanica elevata;
- assoluta impermeabilità ai gas;
- rispetto dell'ambiente (il rame non invecchia ed è totalmente riciclabile).

I tubi FrostEn sono prodotti secondo le norme EN 12735-1 e 2. I tubi FrostEn rispondono anche alla normativa ASTM B280

### Copper pipe for air conditioning and refrigeration, Cu-DHP 99,90 min. According to EN-Norms 12735-1 and 2

The FrostEn copper pipe is the result of new technologies and the most modern answer to growing technical needs. The special inner cleaning treatment results in a perfectly even, bright and specular inner surface, with a carbon residue lower than 38 mg/m<sup>2</sup>, in accordance with EN-Norms 12735-1 and 2. The copper pipe FrostEn can be supplied in annealed coils, hard lengths and IXWC wound coils, with closed ends. The FrostEn copper pipe can be used for air conditioning and refrigeration appliances and it is suitable for the passage of all cooling gases which are compatible with copper, including the new gases R407C and R410A. The control during the production through Defectomat and the constant monitoring of outer diameter and thickness ensure the utmost safety of the FrostEn pipe. The distinguishing features of the FrostEn copper pipe are:

- Particularly accurate inner cleaning.
- Malleability and easy to use.
- Diameter and thickness are perfectly calibrated and constant.
- High mechanical strength.
- Complete gas tightness.
- Environmentally-friendly (Copper does not become old and can be fully recycled).

FrostEn pipes are produced in compliance with EN-Norms 12735-1 and 2. FrostEn pipes comply also with ASTM B280 norms.

### Das Kupferrohr für Kälte-Klimatechnik, Cu-DHP 99,90 min. gemäß EN-Normen 12735-1 und 2

Das FrostEn Kupferrohr ist das Ergebnis der neuesten Technologien und stellt die Antwort auf die ständig höheren technischen Ansprüche dar. Dank dem besonderen Reinigungsverfahrens wird die innere Oberfläche völlig glatt, poliert, symmetrisch und die Kohlenstoffrückstände betragen weniger als 38 mg/m<sup>2</sup>, was den EN-Vorschriften 12735-1 und 2 entspricht. Das FrostEn Kupferrohr wird in Ringen, Stangen und IXWC Rollen geliefert, mit verschlossenen Enden. Das FrostEn Kupferrohr kann für Klima- und Kälteanlagen eingesetzt werden und ist für alle mit Kupfer kompatiblen Kühlmittel geeignet, einschließlich neuer Kühlgase wie R407C und R410A. Die Kontrolle während der Bearbeitung durch Defectomat und die ständige Überwachung des Außendurchmessers und der Wandstärke gewährleisten die höchste Sicherheit des FrostEn Rohrs. Die besonderen Eigenschaften vom FrostEn Rohr sind die Folgenden:

- Die besonders sorgfältige innere Reinigung.
- Dehnbarkeit und einfache Einarbeitung.
- Durchmesser und Stärke mit genauesten Abmessungen und konstant.
- Ausgezeichnete Festigkeitseigenschaft
- Totale Gasdichtigkeit.
- Umweltfreundlich (Kupfer verkaltet nicht und ist komplett wieder verwendbar).

Die FrostEn Rohre werden entsprechend En-Vorschriften 12735-1 und 2 hergestellt. Die FrostEn Rohre entsprechen den ASTM B280 Vorschriften.

Il monoblocco ST54 può essere installato su armadi frigoriferi da 700 lt e da 1400 lt per temperature sia positive che negative. L'alta qualità dei materiali utilizzati, la continua ricerca tecnologica nonché i grandi investimenti nell'industrializzazione del prodotto hanno permesso di creare unità con elevate prestazioni a costi realmente competitivi. Numerosi sono i vantaggi dei nostri monoblocchi rispetto al sistema tradizionale di refrigerazione; elevata efficienza, evaporazione dell'acqua di condensa, sbrinatorio automatico e rapidità d'installazione, grazie alle dimensioni unificate dei vari modelli. Ne consegue una notevole riduzione dei costi di gestione di magazzino ed un servizio post-vendita rapido e semplice che non necessita di personale qualificato.

The ST54 plug-in units can be installed on refrigerated cabinets from 700 lt and 1400 lt for both positive and negative temperatures. The high quality of the materials, the continuous search for new technologies and the great investments to industrialize the product led us create high performance units with really competitive prices. There are many advantages in using our plug-in units in spite of the traditional refrigeration systems: high efficiency, evaporation of the water condensation, automatic defrosting and fast installation, thanks to the standard dimensions of all the models. The costs of stock management will therefore be reduced, and after-sale service will become considerably faster and easier, with no need of specialized technicians.

Die ST54 Plug-in Einheit kann für 700 und 1400lt Kühlschränke angewendet werden, sowohl für positive als auch für negative Temperaturen. Die hohe Qualität der Materialien, die ständige Suche nach technischen Fortschritten und die bedeutenden Investitionen für die Serienfertigung des Produktes haben zur Herstellung von Hochleistungsprodukten zu konkurrenzfähigen Preisen geführt. Die Anwendung unserer Plug-in Einheiten bringt viele Vorteile mit sich, im Vergleich mit den traditionellen Kühlsystemen: hohe Effizienz, Verdunstung vom Kondenswasser, automatisches Abtausystem, schnelle Montage dank den Standardabmessungen aller Modelle. Das führt zur Senkung der Lagerhaltungskosten und zu einem schnellen und effizienten Nachkauf-Kundendienst, das kein Fachpersonal benötigt.

**3394217 STAFFETTA FISSAGGIO ESTERNO**  
per termometro digitale  
elimina la necessità di dover praticare un  
difficilissimo foro rettangolare sull'apparecchiatura  
dove si vuole installare un termometro digitale  
ad incasso con questa staffetta e due viti  
autofilettanti viene garantita una perfetta installazione in tempi brevissimi.

**EXTERNAL FIXING BRACKET**  
for digital thermometer  
it allows to avoid the difficult drilling of a  
rectangular hole on the appliance  
on which the digital thermometer would be installed.  
With this bracket and two self-tapping screws  
you will obtain a perfect installation in a very short time.

**SPANNBÜGEL FÜR AUßENMONTAGE**  
für digitalen Thermometer  
Um den digitalen Einbau-Thermometer auf einem  
Gerät zu installieren, braucht man keines Loch zu machen.  
Mit diesem Bügel und zwei selbstschneidenden  
selbstschneidenden Schrauben  
wird eine perfekte und schnelle Installation möglich.

**3394218 ADATTATORE PER TERMOMETRO DIGITALE**  
dovendo sostituire un vecchio termometro a tamburo  
rotante (solitamente con foro rettangolare  
58,5x25,5 mm.) con un termometro digitale,  
l'adattatore va a coprire il vecchio foro  
praticato sull'apparecchiatura creando una cornice  
all'interno della quale si inserisce il nuovo  
termometro digitale in maniera semplicissima.

**ADAPTER FOR DIGITAL THERMOMETER**  
combined to the digital thermometer  
it replaces the thermometer preset  
for mounting hole 58.5x25.5.  
The adapter covers the mounting  
hole and provides a frame inside of  
which the digital thermometer  
can easily be mounted.

**ADAPTER FÜR DIGITALES THERMOMETER**  
zum Ersatz des alten mechanischen  
Thermometers (Loch 58,5x25,5 mm) mit einem  
digitalen Thermometer, wird das alte Loch  
vom Adapter bedeckt.  
In dem dadurch geschaffenen Rahmen  
wird der neue digitale Thermometer einfach  
eingefügt.

### 3445061 COPY CARD PER LA PROGRAMMAZIONE RAPIDA

Permette di caricare e scaricare rapidamente parametri e dati da uno strumento ad un altro attraverso la connessione seriale TTL.  
Modo d'uso: inserire la copy card nella porta seriale TTL programmare lo strumento  
impostare la memorizzazione della copy card  
estrarre la copy card e inserirla negli altri strumenti da programmare.  
In questo modo si scaricano e si copiano i dati prima della programmazione degli altri strumenti.

### COPY CARD FOR QUICK PROGRAMMING

It allows to quickly upload and download parameters from one device to another through TTL serial connection.  
Way of use: insert the copy card in the serial port TTL program the device  
store the data in the copy card  
extract the copy card and insert it in the other devices that are to be programmed. In this way the data relative to the first programming are uploaded and copied in all the other devices.

### COPY CARD FÜR SCHNELLPROGRAMMIERUNG

Durch die serielle Verbindung TTL können die Parameter und die Daten von einem zu einem anderen Gerät schnell geladen und runtergeladen werden.  
Betriebsart:: die Copy Card in den seriellen Anschluss führen das Gerät programmieren  
die Speicherung der Copy Card einstellen  
die Copy Card herausnehmen, und in die anderen programmierbaren Geräte führen. Damit werden die Daten der ersten Programmierung in allen anderen Geräten runtergeladen und gespeichert.
